HOW  
**COOL**  
IS YOUR  
**VU?**

# HOW COOL IS YOUR VU?

## TRANSITIONAL WINDOW FILM

CoolVu Window Films "transition" from a lighter to a darker tint when exposed to sunlight. On bright sunny days, CoolVu reacts to the sun's intensity and darkens to reduce sun glare and heat gain. On cloudy, rainy days and at night, CoolVu remains unchanged preserving your views and maximizing available daylight.

### PROTECT AGAINST FADING

UV rays will fade your furnishings, upholstery, rugs and valuables. CoolVu transitional films protect your valuable from the sun.

### STAY COOL, SAVE MONEY

Sunlight heats up a house, especially in the summer. CoolVu rejects the solar-generated heat permeating your windows and can reduce your cooling costs.

### EASY ON THE EYES

Reduce annoying glare on your computer, LCD or television and create a pleasant, soothing environment to work and play.

### PERSONAL SAFETY

Windows treated with window film are safer than untreated windows because they reduce harmful UV rays entering your home.

### PRODUCT PERFORMANCE

CoolVu Window Films are designed to appear natural while providing for impressive, adaptive sun control.

CoolVu Window Films:

- Block 99% UV radiation
- Block 80% IR heat
- Transition up to 25%
- Control sun glare up to 80%

### LIFETIME WARRANTY

CoolVu Window Films are guaranteed to be bubble free, not turn purple or peel off your windows for as long as you own your home.
